

Integrative Medicine Lecture Series

Interprofessional Discussion

Fibromyalgia is a chronic condition affecting about 2 percent of the U.S. population. It is characterized by widespread pain in the muscles, ligaments and tendons, as well as fatigue and multiple tender points — places on the body where slight pressure causes pain (Mayo Clinic).

Please join us to listen to four experts representing allopathic, naturopathic, chiropractic and traditional chinese medicine discuss their treatment approaches to fibromyalgia, especially as it relates to lifestyle medicine.

Fibromyalgia

Wednesday, October 27, 2010, 12–1 pm
OHSU Richard Jones Hall, Room 4340

All OCIM lectures are free and open to the community. There is no need to RSVP. Complimentary healthy snacks are provided to early birds.
